National Register of Historic

Places Date: *Not Applicable*

Description

Located at the Eagle Mills Cider Company in Fulton County, this bridge is a genuine 41 ft. town lattice truss. Built in 1967, it is not a historic bridge. It is a well cared for structure near the cider mill. A water wheel near the bridge generates electric power for the cider mill and all it's buildings. The bakery has delicious doughnuts, be sure to try some. The bridge is on private property with no access to the bridge from mid November to about May when the cider company is closed for the season.

Photography

Easy to photograph from many angles. Nice setting on the Cider Company property.

Parking

Parking area available when Cider Company is open, with no access to the bridge from mid November to about May when the cider company is closed for the season.

Truss / Arch

Town Lattice Truss
